

Everyday Dialogues: AI For Workplace Productivity [B1]

Non guardiamo all'intelligenza artificiale come a un avversario pronto a sostituirci, ma come a un prezioso alleato che può aiutarci a migliorare la nostra produttività.

Sam: The [CEO](#) has asked our team to see if artificial intelligence can help us [increase](#) productivity. [What are your thoughts?](#) Janet: I think it could be really useful. AI can help organise our workload. Sam: Organise it how? Janet: Well, it could prioritise tasks and remind us about deadlines. Sam: That would save a lot of time. Can it help with meetings too? Janet: Yes, it can summarise meetings with [accurate](#) minutes. Sam: That sounds almost too good to be true. Janet: Actually, many companies already use [tools](#) like that. Sam: So, will AI [replace](#) some of our staff? Janet: [Not at all](#). We'd just use it to take care of repetitive tasks. Sam: So we can focus on more important work. And we would be more productive! Janet: Exactly! AI should be used to support workers – not [replace](#) them. Language

Small Talk is Great Alla macchinetta del caffè o con il passeggero che ci è seduto accanto in aereo: una chiacchiera, seppur superficiale, aiuta a creare un'intesa.
Daniel Francis

NOW LET'S REVIEW THE VOCABULARY!

Useful means helpful or practical. Workload is the [amount](#) of work to be done. A deadline is the time by which something must be finished. To save time means to reduce the time needed to do something. To summarise means to give the [main](#) ideas in a short form. The minutes are the official [records](#) of a meeting. Too good to be true is an expression used when something seems unbelievable. Actually is used to emphasise or correct information. To [replace](#) means to take the place of someone or something else. To focus on means to give special attention to something.

Glossary
